Dear

The Kirtland's Warblers are in trouble, their numbers are at a precariously low level. Therefore, we are planning to reduce the human disturbance to a minimum by holding conducted tours for those people that want to visit the warbler area. Schedules are not completed as to time of day and which days of the week tours will operate. Certainly, weekends will have preference over the rest of the week. We may run several tours per day on Saturday and Sunday and only one per day during the week. Tours will be from the U. S. Forest Service office in Mio and from the DNR office located in the Hatchery Building in Grayling. People will be assigned to these offices as tour guides. Tours will be from May 18 - July 1.

If you are concerned about a specific time or day, I suggest that you write directly to one of the above offices for information.

Sincerely,

WILDLIFE DIVISION

John Byelich
Wildlife Biologist
